

A Boy Who Helps (Part 2)

The boy gave the money. But he learned \$70

would buy only a hand pump. It would not buy a well.

He learned it cost \$2,000 to drill a well. The boy kept

raising money. His family and friends helped too.

By summer he had earned enough money to drill

a well. Next the boy met a man from Africa. This man

told him it took 20 people ten days to dig a well by

hand. A small drill, the man said, would cost \$25,000.

"I'll raise that," the boy said.

A news writer wrote a story about the boy. Many

people gave money for the drill. In two months the

boy raised over \$7,000.

## Comprehension Questions (for discussion)

1. Why did the boy keep raising money after he earned \$70?
2. Why did the boy raise money for a drill?
3. How did the boy learn how long it took to dig a well by hand?
4. Why do you think a news writer wrote a story about the boy?

## A Boy Who Helps (part 2)

The boy gave the money. But he learned \$70 would buy only a hand pump. It would not buy a well. He learned it cost \$2,000 to drill a well. The boy kept raising money. His family and friends helped too.

By summer he had earned enough money to drill a well. Next the boy met a man from Africa. This man told him it took 20 people ten days to dig a well by hand. A small drill, the man said, would cost \$25,000.

“I’ll raise that,” the boy said.

A news writer wrote a story about the boy. Many people gave money for the drill. In two months the boy raised over \$7,000.
